WORK EXPERIENCE

IT Project Support & Power Platform Development Co-op

DHL Express Canada

May 2026 – Jan 2027

Brampton, ON

- Engineered automated workflows and internal systems using Python, REST APIs, and Microsoft Power Platform to streamline company operations
- Built and deployed internal operational tools through Agile collaboration with stakeholders across multiple departments

Cafe Manager & Event Coordinator

Akedo Festival

July 2025 – Nov 2025

Guelph, ON

- Coordinated logistics and staff scheduling across a cross-functional team for a 200-person event.
- Mitigated real-time operational issues by rapidly adjusting front and backend workflows to ensure smooth service.

Customer Service Representative

The Beer Store

Apr 2024 – April 2026

Toronto, ON

- Processed high-volume transactions accurately and efficiently in a fast-paced environment
- Addressed client inquiries and resolved service issues through clear communication and adapting to varying needs

PROJECTS

DHL CBSA Manifest Clearance Management System

ETL, Data validation & processing

June 2026 – Present

Python, Requests, REST APIs

- Developed a Python data pipeline from the ground up to automate the generation and management of international shipment manifests
- Integrated internal DHL systems with the external CBSA API to seamlessly transmit and process cross-border shipment data
- Drove project delivery within a cross-functional Agile team, managing sprint cycles, daily stand-ups, and bi-weekly stakeholder demos

Legacy C Scientific Calculator

Code Refactoring & Testing

Sept 2025 – Dec 2025

C, Unity, Trello, Git

- Refactored legacy C code to improve system performance, stability, and maintainability
- Designed and implemented unit tests to validate functionality and reduce defects
- Maintained version control and tracked progress across development tasks using Git and Trello
